**EYE PROTECTION**

**INDIRECT VENTILATION**

**FEATURES:**
- Allows air flow, while protecting against splashes.
- Anti-fog/anti-scratch one piece lens.
- Separate, soft, pliable frame.
- Deep design fits over most glasses/adjustable straps.
- Abrasion-resistant lens.
- Meets ANSI Z87+

SEPG211FGQ
Sold by the each, 48/case

**DIRECT VENTILATION**

**FEATURES:**
- Anti-fog/anti-scratch one piece lens.
- Separate, soft, pliable frame.
- Deep wrap around design fits over most glasses / adjustable straps.
- Abrasion-resistant lens.
- Meets ANSI Z87+

SEPG201FGQ
Sold by the each, 48/case

**ECONO SPLASH PROTECTION**

**FEATURES:**
- Indirect ventilation.
- Will not fit over glasses.
- Light weight / flexible frame.
- Adjustable straps.

SEPG211TQ
Sold by the each, 72/case
**EYE PROTECTION**

**FURY®**

**FEATURES:**
- Sleek, frameless wrap around design.
- Ideal for protection against dust and small particles.
- Meets ANSI Z87+ and CSA Z94.3 standards.

**EPS1890X**
Black frame, clear lens.
Sold by the each, 50/case.

**FLEX SEAL™**

**FEATURES:**
- Lightweight, silicone body conforms to assure the highest level of comfort.
- Silicone body stays soft and supple in extreme conditions.
- Anti-fog coating and indirect venting minimizes fogging.
- Meets ANSI Z87+ and CSA Z94.3 standards.

Clear frame, clear lens.
Sold by the each, 50/case.
EYE PROTECTION

3M

UTILITY HELMET

FEATURES:
- Designed for MIG (GMAW) and stick (SMAW) welding only.
- Available in shade 10 or 11.
- Auto off turns off filter 30 minutes after last arc.
- UV/IR protection is constant even when filter is OFF or in the shade 3 light state.
- Ratchet design headgear.
- Viewing area: 3.57” x 1.68” (91mm x 43mm).
- Battery life (average): 2000 hours.

EP04-0014-10U  Shade 10 utility helmet
EP04-0014-11U  Shade 11 utility helmet

Sold by the each, 1/case

9002X HELMET

FEATURES:
- For all arc welding processes including low-amp tig inverters.
- Variable shade 9-13, light shade 3.
- Exhaust vents reduce CO2 build up.
- UV/IR protection is constant, auto-off or immediate off.
- Ratchet design headgear.
- Viewing area: 4.09” x 2.13” (104mm x 54mm).
- Battery life (average): 3000 hours.

Sold by the each, 1/case

SPEEDGLAS™ FLEXVIEW WITH ADFLO™ SYSTEM

FEATURES:
- Welding helmet with respiratory protection.
- Speedglas 9002X autodarkening filter.
- High efficiency filtration of welding fumes.

EP15-1699-35  Flexview welding helmet
EP04-0000-21  9002X autodarkening filter
EP15-5401-01  Adflo PAPR kit with filter.

Sold by the each.
EYE PROTECTION

HEADGEAR

CAUTION: All faceshields should be worn with approved safety spectacles or goggles.

FEATURES:
- Crown-face assembly pivots up and down.
- Floating window suspension.
- Meet ANSI Z87.1-2003

- EPLC7
  300 Tissues / box
  60 Boxes / case
BEFORE YOU CHOOSE... RESPIRATORY PROTECTION

Before you choose a respirator, you must first accept that it is not a “stand alone” piece of safety equipment. It is only one element of a proper “respiratory protection program”. Such a program would include administration, policies, procedures, fit testing, training, and correct selection.

According to CSA Z94.4, selection, use, and care of respirators, which covers the above issues, a respiratory protection program shall consist of the following components:

A PROGRAM ADMINISTRATION
B HAZARD IDENTIFICATION
C SELECTION OF THE APPROPRIATE RESPIRATOR
D RESPIRATOR FACIAL-FIT
E TRAINING
F USE, INSPECTION, AND MONITORING OF RESPIRATORS
G CLEANING, INSPECTION, MAINTENANCE, AND STORAGE OF RESPIRATORS
H HEALTH SURVEILLANCE OF RESPIRATOR WEARERS
I PROGRAM EVALUATION

There are many questions that you must answer before you can select the appropriate respiratory protection for your situation. The following examples will assist you in making the right choice:

- Name of material you want protection from?
- If it is a mixture, then the name of each ingredient?
- The form of the contaminant (liquid, solid, gas, or vapour)?
- Does the material have good warning properties?
- What effect does it have on the body (i.e. eye irritant)?
- How is it used (sprayed, poured, brushed, sanded, etc)?
- Has air sampling been done; how does it compare to OEL’s?
- Determine the hazard ratio (concentration divided by OEL=APF needed)
- Is this an IDLH situation or a confined space?
- Type of work and conditions of work (inside, outside, hot, cold)?
- Number of workers needing protection?
- What is currently used?
- Are there respirator maintenance facilities available?
- Do specific “local regulatory authority” requirements apply?
- Does an oil aerosol exist in the area of use?
